Professional Summary

Results-driven Software Developer with 3+ years of experience delivering high-performance React.js and Next.js web applications across enterprise and startup environments. Proven track record of improving mobile responsiveness by 30%, cutting page load times by 35%, and accelerating development velocity by 25% through reusable component architecture. MCA graduate expanding expertise in Generative AI, Prompt Engineering, and DevOps. Currently seeking U.S.-based frontend, full-stack, or AI-powered application roles.

Experience

Freelance Developer

January 2025 – Present

Pro bono

Dallas, USA

- Building and deploying client websites using Next.js, React.js, and Tailwind CSS with a focus on performance, SEO, and accessibility.
- Integrating AI APIs and automation tools to deliver intelligent web experiences for small business clients.

Frontend Developer and Product Designer

June 2024 – December 2024

EZ Technologies (Pro bono)

Mangalore, India

- Engineered high-performance web applications using React.js and JavaScript (ES6+), improving mobile responsiveness by 30% and achieving 100% cross-browser compatibility across Chrome, Firefox, and Safari. Reduced manual data handling by 40% by architecting dynamic UIs integrated with RESTful APIs and implementing automated data-fetching pipelines.
- Built a reusable component library and optimized frontend asset delivery, increasing development velocity by 25% and reducing page load times by 35%.
- Collaborated with design and backend teams in an Agile environment, consistently delivering features on schedule across 2-week sprint cycles.

Teamcenter Developer (PLM)

October 2022 – January 2024

Tata Consultancy Services (TCS)

Bangalore, India

- Implemented enterprise PLM solutions using Siemens Teamcenter for a large-scale manufacturing client, streamlining complex business workflows and improving overall efficiency by 20% and Reduced system downtime by 15% by enhancing 2-tier and 4-tier architectures through rigorous monitoring, configuration management, and root-cause analysis.
- Engineered .NET REST APIs and executed advanced BMIDE customizations to automate administrative workflows, eliminating 30% of manual overhead and enabling a team of 12+ engineers.
- Delivered technical documentation and led knowledge-transfer sessions for new team members on Teamcenter configurations and best practices.

Projects

IronGuard Chat - AI Safety Chatbot

🐙 Repository

May 2026

- Built a full-stack AI chatbot with React frontend and Flask backend, integrating GPT-2 Medium via Hugging Face and improving response-handling efficiency by 70%.
- Designed and implemented a risk-analysis filter pipeline to detect and block harmful prompts before model processing, achieving high accuracy in unsafe-input prevention.

Kalpavedike - Religious Organization Website

🐙 Repository

December 2025

- Designed and deployed a fully functional, accessible website for a devotee community, achieving 30% faster load times through Next.js server-side rendering and image optimization.
- Ensured seamless, responsive UX across all device sizes using Tailwind CSS utility-first design system.

Attendance Management System - Face Recognition UI

🐙 Repository

December 2024

- Developed responsive frontend interfaces for a face-recognition attendance platform, improving user interaction and usability scores by 30%.
- Strengthened UI/UX components, reducing attendance processing time by 25% through streamlined workflows and real-time status feedback.

Technical Skills

Technologies/Frameworks: React.js, Next.js, Tailwind CSS, Bootstrap, Redux, React Testing Library, Jasmine

Programming Languages: Python, JavaScript (ES6+), C, C++, .NET, HTML5, CSS3, PHP

Backend & APIs: Node.js, RESTful APIs, Flask

Databases and Enterprise Platforms: MongoDB, MySQL, Siemens Teamcenter, BMIDE, ERPNext

AI / ML: OpenAI API, Hugging Face Transformers, GPT-2, LangChain, Prompt Engineering, Generative AI

Tools and DevOps: Git, GitHub, GitHub Actions, Vercel, Postman, Figma, Visual Studio Code, Jira, WordPress

Concepts: Web/UI Development, Component Architecture, Responsive Design, CI/CD, Wireframing, Prototyping, Agile/Scrum, Debugging, AI/ML, Cross-Browser Compatibility

Education

Master of Computer Applications (MCA)

2020 – 2022

Srinivas Institute of Technology affiliated with Visvesvaraya Technological University (VTU)

Karnataka, India

Certifications

- AI Whisperer : Crafting Effective Prompts - Generative AI, Prompt Engineering – University of South Florida
- AI and Career Empowerment : AI Fundamentals, Career Development – University of Maryland
- UI/UX Design : User Interface Design, User Experience – Great Learning
- UX Foundations : Interaction Design, Interaction Design Principles – LinkedIn Learning
- Front-End Development (HTML & CSS, JavaScript) : Web Development, Responsive Design – Great Learning
